Title: Pandemics

Students: Sara Gomiero, Leonardo Tessari, Riccardo Grimaldi, Riccardo Buso.

School: I. Nievo, Padova

Teacher: Alessandro Giacon

Researchers: Alberto Zanardo, Riccardo Colpi (Department of Mathematics of Padova University)

Short presentation of the research topic.

The research consists of an analysis of an epidemic crisis, in which, day after day a contagious disease continues spreading through the population. This illness must be analyzed during all its phases, from incubation to the death of the patient, with all the probabilities of certain events happening, ultimately finding the best and most efficient way of curing the population.
